ANTONINI
N A V I

SLIVY

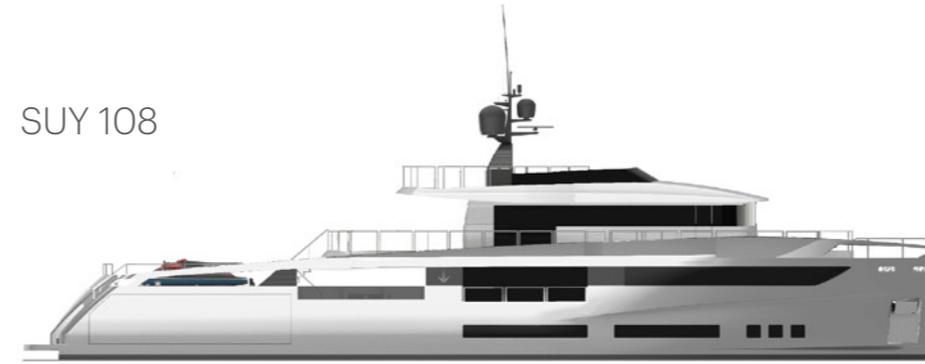

THE SUY LINE

The SUY line of 'Sports Utility Yachts', was developed by Aldo Manna, Partner and Sales Director for Antonini Navi, together with Fulvio De Simoni who has designed many iconic yachts over a long-standing career.

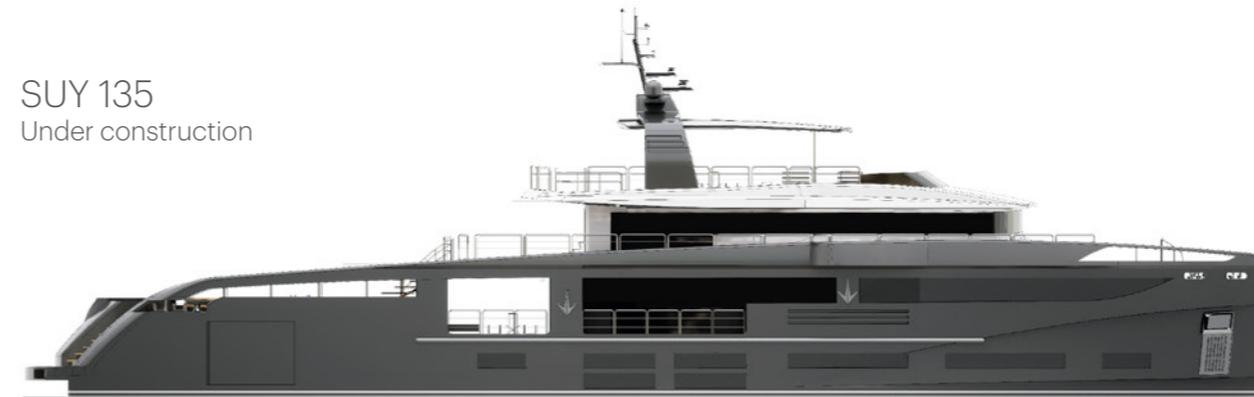

Comprising three models, the SUY 108, SUY 135, and SUY 190, the concept seeks to fulfil the growing demand for a brand-new superyacht class with all-round seafaring ability – able to sail in deep waters with comfort and luxury, but remaining in close contact with the ocean and marine life.

Sporting an innovative layout with a raised aft deck that's separated from the saloon by a lower-level veranda, more privacy is created for when the yacht's in port and, at the same time, a versatile hangar space for use as a beach club or storing additional toys.

FOR DELIVERY IN 2026

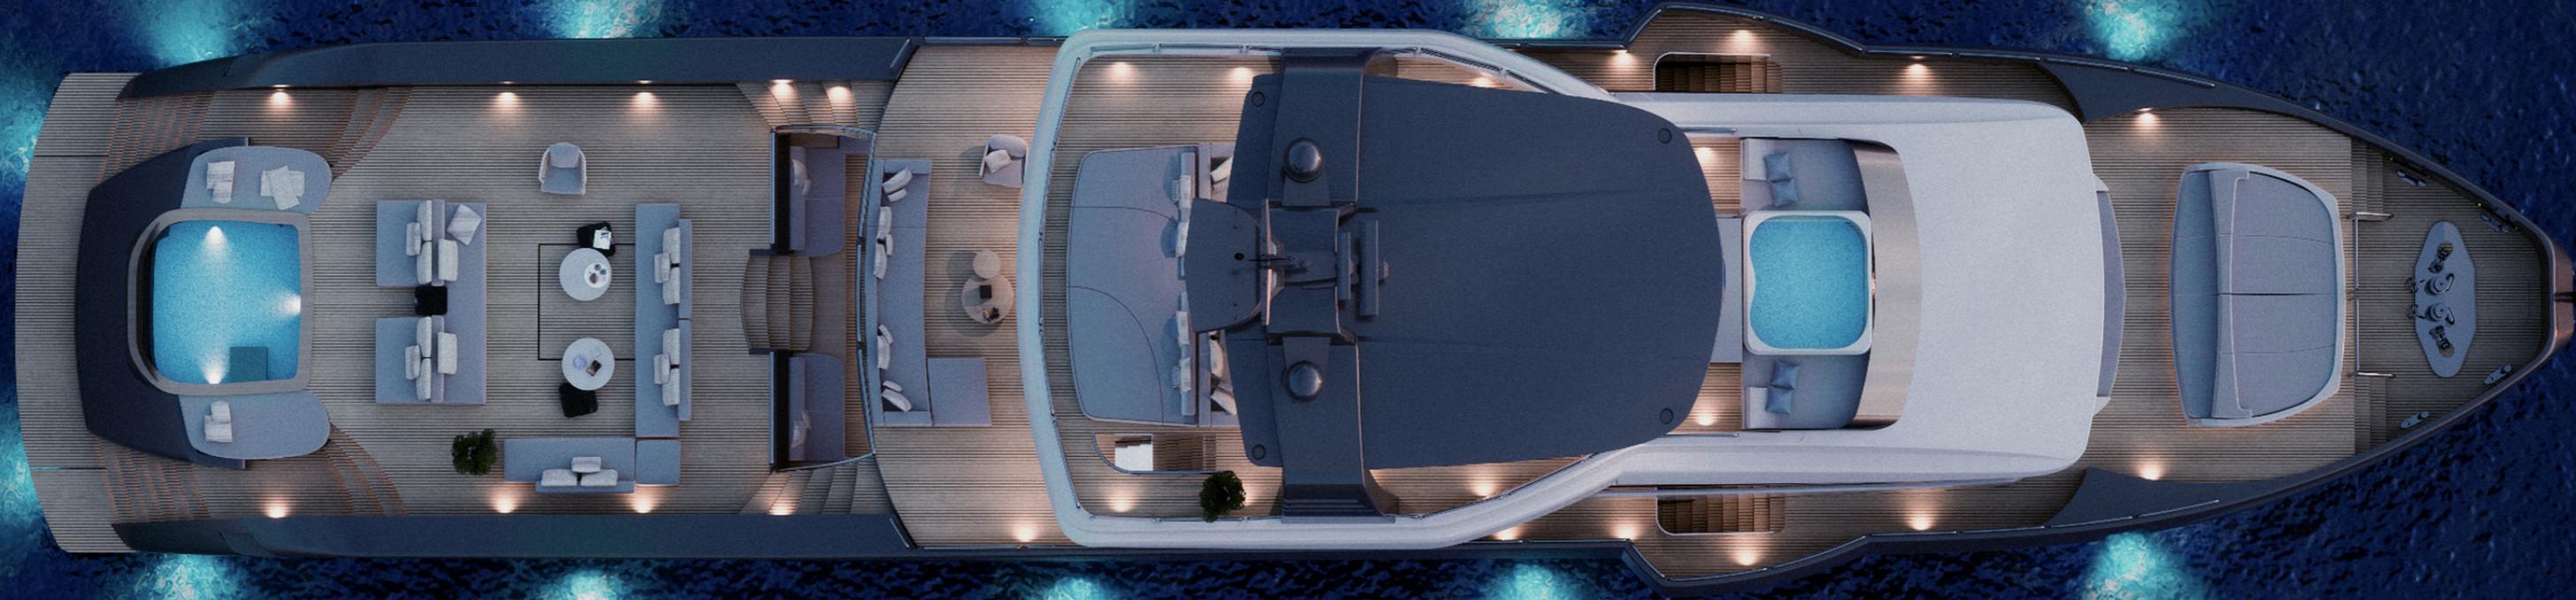

The Antonini Navi SUY 135 is currently in build at the shipyard's facility in Italy and is due for delivery in 2026. Measuring 44m in length and coming in at approximately 462GT, this displacement motor yacht will be the first in the yard's new line of Sports Utility Yachts.

The SUY line has been designed by Fulvio de Simoni, with naval architecture by Studio Arrabito. Constructed in steel, the SUY 135 pairs a more typical superyacht aesthetic with incredible world-cruising capability.

Static and dynamic testing of the hull, hull lines and appendages was performed at the MARIN Maritime Research Institute in the Netherlands, simulating seakeeping in extreme navigation conditions.

The clever naval architecture, engineering and internal compartmentation are designed to allow full internal and external customisation by the clients. Small structural modifications to adapt the hull are also possible.

The proposed interior layout features a main and upper deck connected via a raised deck with a short staircase

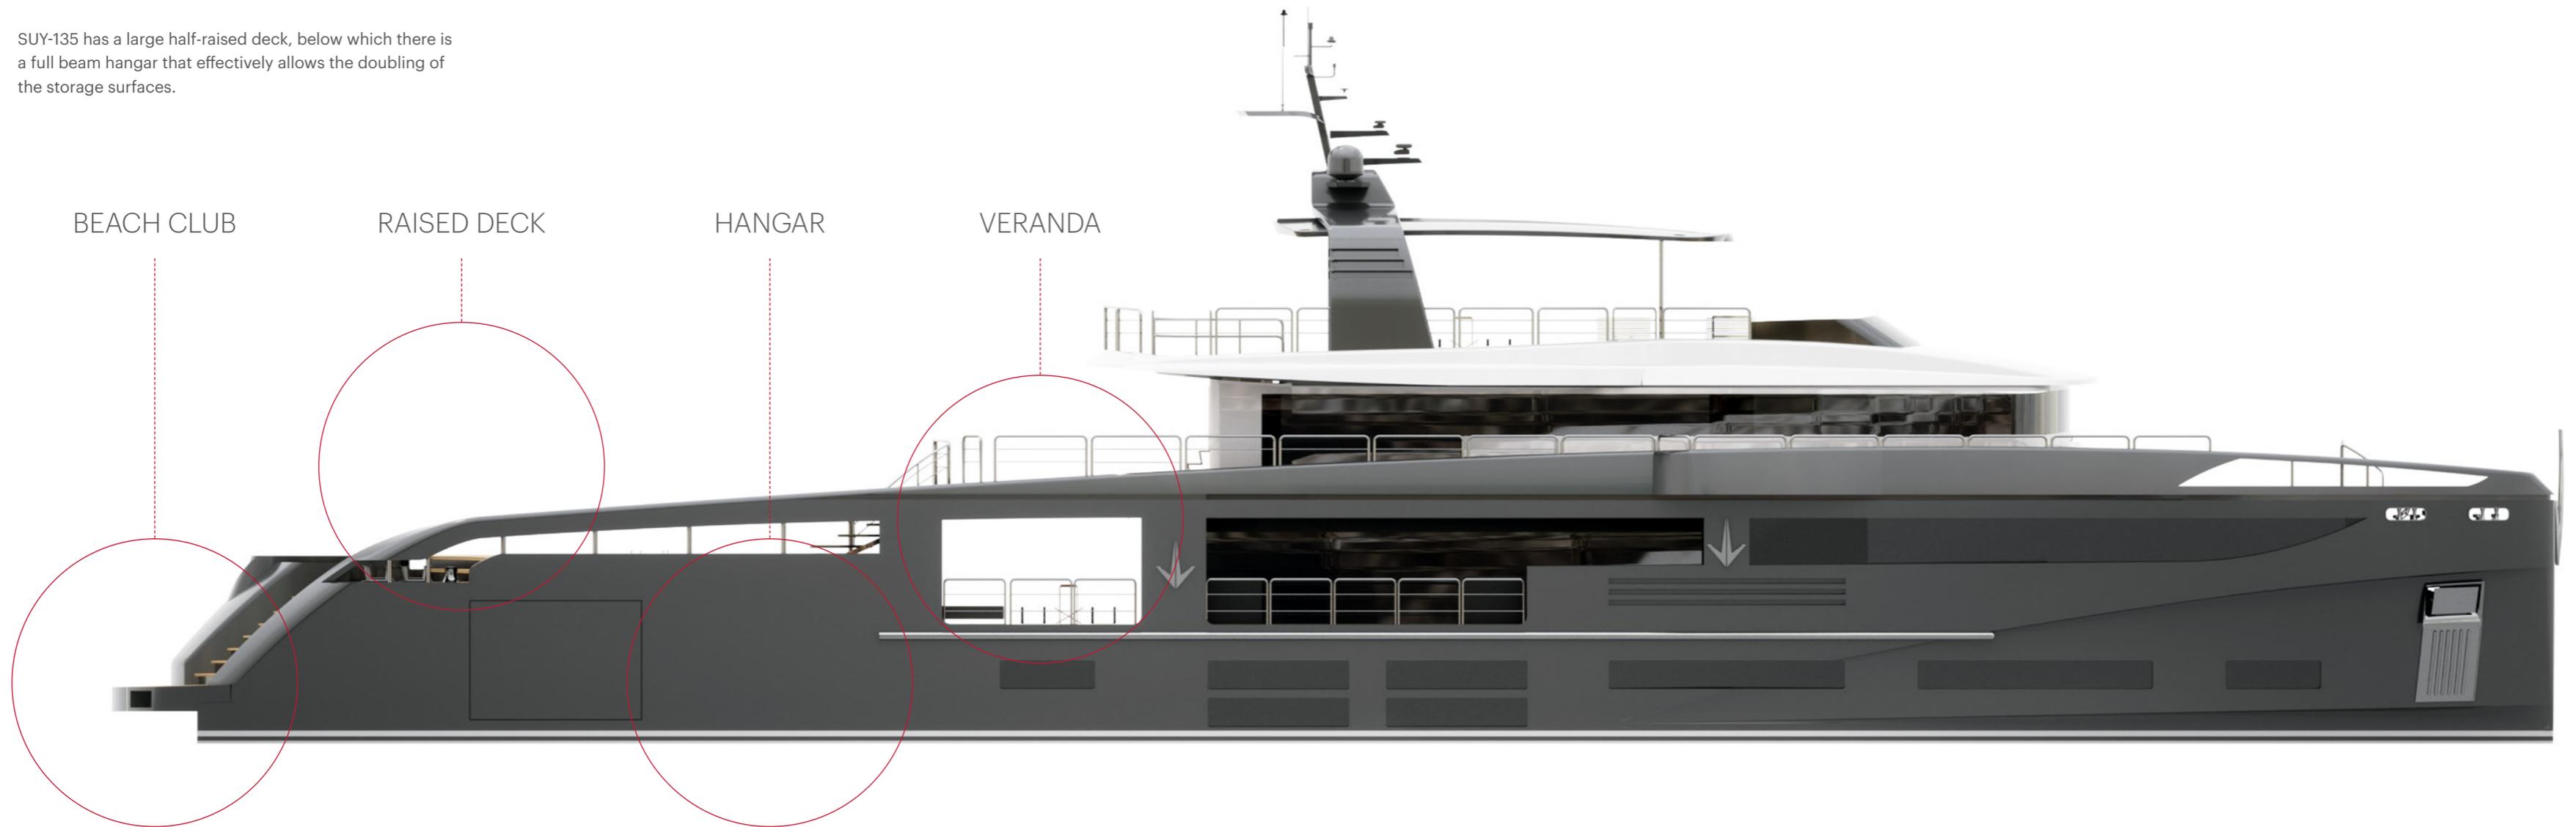

The accommodation comprises a 56sq.m owner's suite – located on the main deck – and four en suite cabins on the lower deck. There is separate accommodation for the captain and 6 crew.

Buyers can customise the interior design to their liking, with other arrangement options offered by the shipyard including a gym suite and spa/sauna, and different cabin configurations. Each unit can be adapted to reflect the needs of the client.

SUY 135 UNDER CONSTRUCTION

SUY-135 has a large half-raised deck, below which there is a full beam hangar that effectively allows the doubling of the storage surfaces.

The SUY 135's exterior spaces include a 40sq/m veranda with an al fresco dining space that's sheltered from the elements and made more private thanks to its position beneath the raised deck, and a 35sq.m beach club with transom Jacuzzi. On the sun deck, a second Jacuzzi is positioned forward to make the most of the elevated views, there's also a bar counter with stools, casual dining table, and aft-facing sun pads.

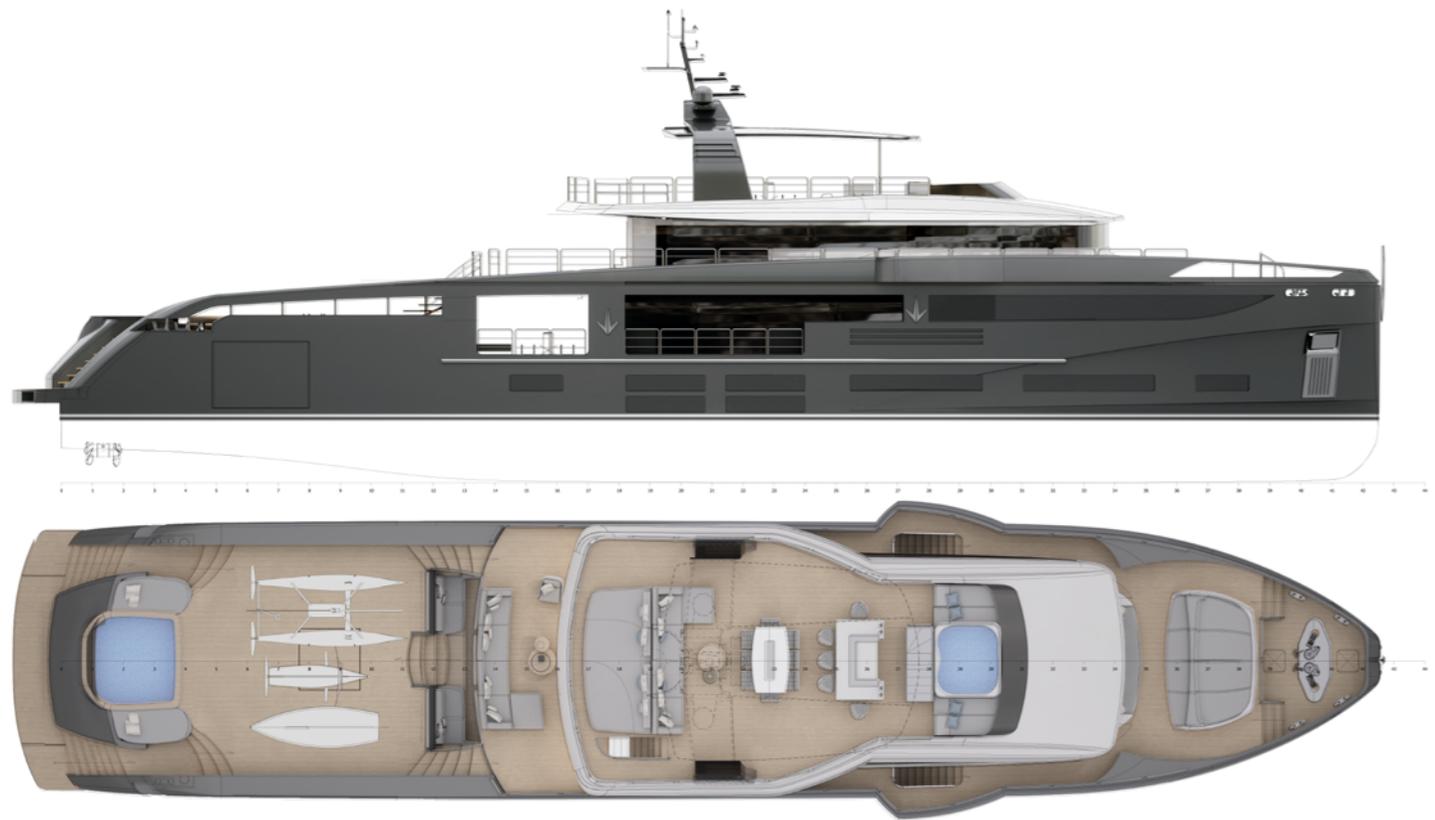

A sizable transversal tender garage stows a 7-metre RIB and leaves plenty of space for water toys.

The SUY 135 has a range of 4,000nm at her economical 10 knot cruising speed and a top speed of 15 knots. Zero-speed stabilisers ensure heightened levels of comfort.

Antonini Navi have already sold and is currently producing three yachts : Explorer 32m, Crossover 34m and M/Y UP40 40m.

GENERAL ARRANGEMENT

A SHIPYARD WITH HERITAGE

Founded in the 1940s upon the acquisition of a historical shipyard, the Antonini Navi facility has today grown into an impressive industrial force.

The yard's longstanding experience building vessels for naval requirements, the commercial sector and oil industry offers a superyacht client heightened levels of quality control and stringent processes.

Located in La Spezia, Italy's premier superyacht hub, Antonini Navi benefits from the close proximity of advanced yachting services such as systems engineers, interior fit-out and furnishers, and a yachting community striving for global recognition for its excellence.

Antonini Navi's move into the superyacht sector came in 2020, beginning with the construction of hulls for other well-known brands. They have since built eight hulls for third parties and completed refits on over 20 superyachts. Entrusted by many notable names, Antonini's ability and quality is clear.

Antonini Navi has financed and executed numerous projects in collaboration with renowned designers such as Fulvio De Simoni, Hot-Lab and Studio Sculli, as well as engineering teams like HydroTec and Studio Arrabito. Each project is customisable both in external appearance and internal layout, allowing room for the client's imagination.

Antonini Navi remains a family-owned and operated shipyard. Creating the 'perfect ship', which is tailored to the future owner, reflecting their personality and meeting their needs, is the family's objective.

THE DESIGN PARTNERSHIP

FULVIO DE SIMONI
YACHT DESIGN

Fulvio De Simoni Yacht Design was born from the desire to progress and expand what Fulvio De Simoni had been able to achieve during his prestigious career to date. The company's evolution came in 2015 and was a natural continuation of a path that began over forty years ago.

Today, Fulvio is joined by Enrico Lotti and Cristiano Tonarelli who work in close collaboration with the famed architect, sharing a passion for design and the continuous search for new stimuli and challenges. This is expressed in the constant search for new and original ideas and projects, and represents the precious legacy of Fulvio De Simoni still evident in the studio's work today.

Passion and ideas that are constantly nurtured by a team of young and valuable collaborators. Among the design studio's most recent works are important projects for Pershing, Rossi Navi, Antonini Navi, Austin Parker, Rodman, Astondoa, Filippetti Yacht.

ABOUT MORAVIA YACHTING

The mission of Moravia Yachting is simple: to match discerning owners and charterers with their perfect vessel, with discretion, with efficiency, and adding the value afforded by our expert knowledge at every opportunity.

We are trusted by our clients to deliver optimal investment choices on all aspects of acquisition, sale, and charter.

Moravia promises yachting prowess for exacting owners, with a heightened understanding of service excellence. We empower our clients with unrivalled technical, operational, and international industry knowledge.

Expertise comes from experience and our specialised understanding, accrued from years of successful sales completed with integrity, proficiency, and the close attention to detail that our clients deserve, has afforded us a leading reputation.

We operate cohesively, providing a unique combination of highly specialised services with an unwaveringly client-centric approach. Our experienced team and extensive network of collaborative partners enables us to elevate superyacht ownership to new heights, moving beyond bespoke to the truly extraordinary.
